

Rules summary sheet: Abercrombie River above Wyangala Water Source

Water Sharing Plan for the Lachlan Unregulated River Water Sources 2012

Plan details

Water sharing plan	Lachlan Unregulated River Water Sources 2012
Plan commencement	14 September 2012
Term of the plan	10 years

Important: This factsheet summarises the rules contained in the *Water Sharing Plan for the Lachlan Unregulated River Water Sources 2012*. It is intended as a guide only. Approvals and licences also contain conditions that holders must comply with. You can access this information from your 'Statement of Approval' or 'Statement of Conditions' or alternatively via <https://waterregister.waternsw.com.au/water-register-frame>.

Access Rules

Access rules for rivers and creeks		
Cease to pump	Very Low Flow Class	<p>For years one to five, users must cease to pump when the flow at the reference point is 0 ML/day.</p> <p>For years six to the end of the plan, users must cease to pump when the flow at the reference point is equal or less than 7 ML/day.</p> <p>Note: This rule applies to all extraction from rivers and creeks including natural in-river pools within the channels of rivers and creeks.</p>
	A Class	<p>For years one to five, users must cease to pump when the flow at the reference point is more than 0 ML/day.</p> <p>For years six to the end of the plan, users must cease to pump when the flow at the reference point is more than 7 ML/day.</p> <p>Note: This rule applies to all extraction from rivers and creeks including natural in-river pools within the channels of rivers and creeks.</p>
Reference point	Abercrombie River at Abercrombie gauge (412028)	

Access rules for natural off-river pools

Cease to pump	<p>Pumping is not permitted when the water level in that natural off-river pool is lower than its full capacity</p> <p>Note: 'Full capacity' can be approximated by the pool water level at the point where there is no visible flow into and out of that pool.</p> <p>Note: Natural off-river pools include those pools which are located on flood runners, floodplains and effluents e.g. lakes, lagoons and billabongs.</p>
Reference point	Individual off-river pool

Notes:

These access rules do not apply:

1. If the existing *Water Act 1912* entitlement had more stringent access licence conditions. These existing conditions will be carried forward under the plan and are included in schedule 1.
2. To major water utility, local water utility or unregulated river (town water supply) access licences.
3. To water taken for domestic consumption by stock and domestic access licences.
4. For the first 5 years of the plan to water taken for stock watering by stock and domestic access licences.
5. To water taken from existing dams. Any existing licence conditions associated with a dam will be carried forward under the plan.

Trading rules

Trade type	Rules
Into water source	Not permitted
Within water source	Permitted, subject to assessment except into the area upstream of the junction of the Abercrombie River and Bolong River, from the catchment area downstream.

Rules summary sheet: Humbug Creek Water Source

Water Sharing Plan for the Lachlan Unregulated River Water Sources 2012

Plan details

Water sharing plan	Lachlan Unregulated River Water Sources 2012
Plan commencement	14 September 2012
Term of the plan	10 years

Important: This factsheet summarises the rules contained in the *Water Sharing Plan for the Lachlan Unregulated River Water Sources 2012*. It is intended as a guide only. Approvals and licences also contain conditions that holders must comply with. You can access this information from your 'Statement of Approval' or 'Statement of Conditions' or alternatively via <https://waterregister.waternsw.com.au/water-register-frame>.

Access Rules

Access rules	
Cease to pump	<p>Pumping is not permitted from natural pools when the water level in the pool is lower than its full capacity.</p> <p>Note: 'Full capacity' can be approximated by the pool water level at the point where there is no visible flow into and out of that pool.</p> <p>Note: Natural pools include in-river pools which are located within the channels of rivers and creeks and off-river pools which are located on flood runners, floodplains and effluents e.g. lakes, lagoons and billabongs.</p> <p>Note: For pump sites not within a natural pool, the cease to pump rule applies when there is no visible flow at that pump site.</p>
Reference point	Individual natural pool

Notes:

These access rules do not apply:

1. If the existing *Water Act 1912* entitlement had more stringent access licence conditions. These existing conditions will be carried forward under the plan and are included in schedule 1.
2. To major water utility, local water utility or unregulated river (town water supply) access licences.
3. To water taken for domestic consumption by stock and domestic access licences.
4. For the first 5 years of the plan to water taken for stock watering by stock and domestic access licences.
5. To water taken from existing dams. Any existing licence conditions associated with a dam will be carried forward under the plan.

Trading rules

Trade type	Rules
Into water source	Not permitted
Within water source	Permitted, subject to assessment.

More information about the planning process for the *Water Sharing Plan for the Lachlan Unregulated River Water Sources 2012* is available at the Department of Planning, Industry and Environment's website: www.industry.nsw.gov.au/water

Water Sharing Plan for the Lachlan Unregulated River Water Sources 2012

Plan details

Water sharing plan	Lachlan Unregulated River Water Sources 2012
Plan commencement	14 September 2012
Term of the plan	10 years

Important: This factsheet summarises the rules contained in the *Water Sharing Plan for the Lachlan Unregulated River Water Sources 2012*. It is intended as a guide only. Approvals and licences also contain conditions that holders must comply with. You can access this information from your 'Statement of Approval' or 'Statement of Conditions' or alternatively via <https://waterregister.waternsw.com.au/water-register-frame>.

Access Rules

Access rules for rivers and creeks		
Cease to pump	Very Low Flow Class	<p>For years one to five, users must cease to pump when the flow at the reference point is 0 ML/day.</p> <p>For years six to the end of the plan, users must cease to pump when the flow at the reference point is equal or less than 2 ML/day.</p> <p>Note: This rule applies to all extraction from rivers and creeks including natural in-river pools within the channels of rivers and creeks.</p>
	A Class	<p>For years one to five, users must cease to pump when the flow at the reference point is more than 0 ML/day.</p> <p>For years six to the end of the plan, users must cease to pump when the flow at the reference point is more than 2 ML/day.</p> <p>Note: This rule applies to all extraction from rivers and creeks including natural in-river pools within the channels of rivers and creeks.</p>
Reference point	Lachlan River at Narrawa gauge (412065)	

Access rules for natural off-river pools

Cease to pump	<p>Pumping is not permitted when the water level in that natural off-river pool is lower than its full capacity</p> <p>Note: 'Full capacity' can be approximated by the pool water level at the point where there is no visible flow into and out of that pool.</p> <p>Note: Natural off-river pools include those pools which are located on flood runners, floodplains and effluents e.g. lakes, lagoons and billabongs.</p>
Reference point	Individual off-river pool

Notes:

These access rules do not apply:

1. If the existing *Water Act 1912* entitlement had more stringent access licence conditions. These existing conditions will be carried forward under the plan and are included in schedule 1.
2. To major water utility, local water utility or unregulated river (town water supply) access licences.
3. To water taken for domestic consumption by stock and domestic access licences.
4. For the first 5 years of the plan to water taken for stock watering by stock and domestic access licences.
5. To water taken from existing dams. Any existing licence conditions associated with a dam will be carried forward under the plan.

Access Rules

Access rules (excluding Lake Waljeers)

Cease to pump	<p>Pumping is not permitted:</p> <ul style="list-style-type: none"> from a location other than a pool when there is no visible flow at the point where the water is to be taken from a natural pool when the volume of water in the pool is less than full capacity from an in-river dam pool unless those flows specified on the work approval are passed, and the licence holder has not received written advice from the Minister permitting access for the specified period. <p>The Minister may not permit pumping unless the following requirements are met:</p> <ul style="list-style-type: none"> the licence holder has written to the Minister requesting access replenishment flows have been provided for in the Lachlan Regulated River Water Sharing Plan a visible flow is being maintained in the Lachlan River at Geramy all orders in the Lachlan Regulated River water source are met downstream of the junction of the Lachlan Regulated River and the creek on which the water supply work is located daily environmental releases are not being made from Wyangala Dam, and releases are not being made from the environmental contingency allowance held in Wyangala Dam or Lake Brewster or the water quality allowance. <p>Note: 'Full capacity' can be approximated by the pool water level at the point where there is no visible flow into and out of that pool.</p> <p>Note: Natural pools include in-river pools which are located within the channels of rivers and creeks and off-river pools which are located on flood runners, floodplains and effluents e.g. lakes, lagoons and billabongs.</p>
---------------	---

Note: For pump sites not within a natural pool, the cease to pump rule is when there is no visible flow at that pump site.

Access rules for Lake Waljeers

Cease to pump	<p>Pumping is not permitted when the water level in Lake Waljeers is 20% below the lake's full capacity.</p> <p>Note: 'Full capacity' can be approximated by the water level at the point where there is no visible flow into and out of the lake</p>
Reference point	Lake Waljeers

Notes:

These access rules do not apply:

1. If the existing *Water Act 1912* entitlement had more stringent access licence conditions. These existing conditions will be carried forward under the plan and are included in schedule 1.
2. To major water utility, local water utility or unregulated river (town water supply) access licences.
3. To water taken for domestic consumption by stock and domestic access licences.
4. For the first 5 years of the plan to water taken for stock watering by stock and domestic access licences.
5. To water taken from existing dams. Any existing licence conditions associated with a dam will be carried forward under the plan.

Trading rules

Trade type	Rules
Into water source	Not permitted
Within water source	<p>Permitted, subject to assessment</p> <ul style="list-style-type: none"> • within each individual creek, or • onto Willandra Creek, Middle Creek or Merrowie Creek if the licence was located on Lake Waljeers <p>Not permitted between creeks.</p> <p>Not permitted onto Lake Waljeers.</p> <p>Not permitted onto an off-river pool.</p>
